RE: Request for Special Temporary Authority Dickinson tower

This letter is to request Special Temporary Authority (STA) for Harris County ITC Regional Radio Center 800MHz application. The Harris County Regional Radio System is a shared resource interagency public safety radio communications system. The Regional Radio System supports state, local and federal agencies with approximately 33,000 users in the 13 county areas. We are requesting to reuse existing frequencies from our regional system in the Conroe area, to assist additional loading issues on the Dickinson tower because of hurricane Ike hitting the Galveston area.

Sincerely,

James Bridwell

Radio Systems Supervisor
Harris County Regional Radio
